80

PROJECTS

Smart Soil Nutrition Monitoring system for Sustainable Agriculture

Designed and developed a smart IoT system to monitor soil health parameters like nitrogen (N), phosphorus (P), potassium (K), moisture, and temperature in real-time. The system helps farmers optimize fertilizer use and improve crop yield using sensor data and cloud storage.

Edubuddy Smart Study

Developed a smart web-based study portal that provides CSE students with centralized access to notes, question papers, video lectures, and study materials. Integrated authentication, resource management, and responsive design to ensure a smooth, mobile-friendly learning experience.

INTERNSHIP AND WORKSHOP CERTIFICATE

Codesoft web development

Coursea: Git and GitHub

Flutter Android development
